**FOIL APPLIED ACCESSORIES**

**A perfect match** between profile and accessory is now possible thanks to a revolutionary process that allows the same foil to be applied to both accessories (end caps, joint covers, external angles) and profile. Where this is not possible, fabricated accessories will be supplied. Please contact the sales office for full details.

Light Oak, Mahogany and Brushed Aluminium profile and accessories are available ex stock. Other surface finishes can be supplied to your specification.\*\* Examples of other surface finishes include:

- Further wood grain effects such as Beech, Walnut and Black Ash
- Further metallic effects such as brass
- Mirrored effects
- Solid Colours
- Water Droplet
- Stone and marble finishes

The range of surface finishes is extensive, please call us to discuss your particular requirements or a specific finish. End caps should be secured into position using adhesive (ADH). \*\* Please note that minimum production runs may apply.
